

MINI WINDOW TILE SCENES

Let these mini tile scenes transport you to the countryside of several coveted destinations. Whether you have been to the hills of Tuscany and want to reminisce, or you're dreaming of a Tuscan getaway, this collection will leave you spellbound. Take a trip to the plains of Africa or enjoy a macaron in Provence, France, it's all up to you!

Each scene features blocks that are framed with our signature folded fabric borders to give the appearance of a window frame once blocks are pieced together. The misty horizons are accentuated by a delicate layer of white organza to give the realistic appearance of hills in the distance.

PUFFY PETALS

These designs let the stitching do the talking. We went with a simple black background with a beautiful and bright snowy white thread to really show the contrast and depth. Try stitching out your own creations with different threads, like variegated or metallic twist.

An important note to make for a successful design is matching the thread to the foam beneath the satin stitches. For example, if you use a green colored foam and stitch red on top, you are sure to see the green foam underneath!
